

Subcapacity Model Ratings

Z10 EC Model capacity:

- 700, 401 to 412, 501 to 512
601 to 612 and 701 to 764
- Capacity setting 700 does not have any CP engines
- Nxx, where N = the capacity setting of the engine and xx = number of PUs that are characterized as CPs in CEC
- Once xx exceeds 12, then all CP engines are full capacity
- All specialty engines run at full capacity.
